Function

Bern, Click or tap to enter a date.      Signature: .....

#### *Second signature (if necessary):*

First name, Surname  
Function

Bern, Click or tap to enter a date.      Signature: .....

## Administrative information

### **Simplification of the signature process (OPTIONAL):**

It is up to the parties to simplify the signature process with each other using this template. For this purpose, the principal research partner shall provide all contracting parties with the aforementioned funding agreement together with the present power of authority document.

The terms and conditions of the authority are set out in this template. These are minimum standards from which no deviation is permitted.

If you as a contracting party agree to the terms and conditions stated in the funding agreement, it is sufficient for you to complete and sign this power of authority form. To do this, you can digitally sign the PDF directly; however, you are also free to print out this document, sign it by hand and then scan it.

All you need to do is send a signed PDF of these two pages back to the principal research partner. The principal research partner will then also sign the funding agreement on your behalf and send all the necessary documents to Innosuisse.

### **Help line:**

If you have any questions relating to signing, please contact the relevant team. The contact details can be found on the cover sheet of the contract and on our homepage [www.innosuisse.ch](http://www.innosuisse.ch).
